

TASKI® swift 35

Dry foam carpet cleaning machine

Key Features

- ▶ Innovative dry foam system
- ▶ Minimum down time
- ▶ Reduced need for spray-extraction cleaning
- ▶ Increased productivity

Innovative dry foam system

- ▶ As a result of the low humidity, revitalized areas can be opened to traffic shortly after intermediate dry foam cleaning.

Reduced need for spray-extraction cleaning

- ▶ The dry foam cleaning method maintains the high aesthetic characteristics of carpets and increases their lifetime. The frequency and therefore cost of deep cleaning is reduced by applying this intermediate dry foam method.

Immediately dry floors

- ▶ The excellent drying result allows use of the machine at any time of the day, while reducing the potential risk of slip-fall accidents caused by wet floors.

Increased productivity

- ▶ Compared to the bonnet cleaning method, the TASKI swift 35 machine is more than twice as productive. The machine is easy and comfortable to operate, even after prolonged use.
